

2012 United States Rotax Max Challenge Supplemental Sporting Regulations

1. General Conditions

1.1. Observation of the Regulations:

-It is the driver's responsibility to ensure that all persons concerned with his/her-self observes all the regulations of the RMC Sporting, Technical and all Supplemental Regulations.

1.2. Entry:

-The entry into an event is considered to be the driver.

-The driver is solely responsible for the entirety of their actions, conformability of their kart, respective equipment, and all persons concerned with them, throughout the entire duration of an Event.

-Substitute and "Test" Drivers are prohibited from participating in any element.

-Drivers under the age of 18, at their discretion, may be accompanied by a single representative concerning matters pertaining to the event.

1.3. Credentials:

-Any person associated with a driver must at all times wear the appropriate credentials, which have been provided to them. Failure to properly display the official credentials may subject the driver and the offender to penalties deemed appropriate by the officials, including exclusion from the event.

1.4. Conformity:

-The Drivers must ensure that their karts comply with the conditions of conformity and safety throughout the event.

-The presentation of a kart for pre-technical compliance inspection will be deemed an implicit statement of conformity. It is the sole responsibility of the driver to maintain entire conformity of their kart throughout the remainder of the event.

1.5. Facility Cleanliness:

-All persons are asked to clean up after themselves. Please leave the track as you were leaving your own Track. Track Owners provide a place for you to race and would appreciate respect of their property. Any damage or cleanup related to any person may be held against him/her.

2. Eligible Karts and Equipment:

-Karts with Rotax Max engines in different configurations, as defined by the ROTAX MOJO MAX Technical Regulations.

-Each driver will be entitled to submit to Pre-Technical Compliance Inspection or known as (Pre-TCI) the following equipment:

2.1. Number of Chassis allowed per event-weekend:

-Drivers will be allowed to declare one chassis only during an event. However, if a driver's declared chassis sustains irreparable damage during an on-track incident, the replacement of that chassis with another will be at the SOLE discretion of the Chief Technical Inspector. This decision will be final.

-A declared chassis table may be utilized for inspection.

2.2. Number of engines allowed per event-weekend:

-Drivers will be allowed to declare two engines at the time of Pre-TCI. Both engines will need to be declared using the official Declaration/Pre-Tech form.

-By following proper procedures, a driver may "SHARE" a back-up engine with another driver(s). Mandatory procedures giving a driver this option will be outlined specifically in the "Official Event Supplemental Regulations" which is handed out prior to the event or during registration. If no procedures are spelled out, the general requirements will be for a driver to fill out a "Shared Engine Request Form" and turn it in at the Technical Compliance Inspections area.

3. Technical compliance Inspecting:

-During the initial Pre-TCI, which will take place on the dates and at the times and locations specified on the official event schedule, each competitor must have all required documents and equipment available.

-Clerical errors may be subject to penalty.

3.1. Time Limits:

-Unless a waiver is granted by the event organizer or Chief Technical Inspector in particular circumstances, Drivers must adhere to the time constraints posted in each RMC or IRMC Event Schedule.

-Time penalties may be enforced

3.2. Declaration/Pre-Technical Form:

-The Declaration/Pre-Tech Form can be found in registration

-During registration each Competitor will receive a Declaration/Pre-Tech Form for each class entered. All details relating to the equipment must be checked and filled in on this form, and the person submitting the equipment for Pre-TCI must sign the form, before submission of the kart to be inspected. An incomplete Declaration/Pre-Tech Form will be rejected.

- The accuracy of information checked and filled in on the Declaration/Pre-Tech Form is the sole responsibility of the Driver.

-At the initial check, the driver must present his/her kart chassis, helmet, chest protector (depending on class), engine passports and completed Declaration/Pre-Tech Form.

-A driver shall not be allowed to change his/her equipment after it has been identified at Pre-TCI following proper procedures and the approval of the Chief Technical Inspector.

-If the guidelines of this Declaration/Pre-Tech form are not followed during any official on track session a Disqualification may be assessed.

-It is the driver's responsibility to remain compliant for the entire event regarding the conformity of the chassis and safety requirements

3.3. Sporting Checks:

-Only equipment that has been properly processed by the procedures outlined in the event regulations will be allowed to participate in any on track sessions. At any time during an Event, the technical inspectors may:

- Check the eligibility of the kart or of the Driver's equipment
- Require a kart to be dismantled by the Competitor to make sure that the conditions of eligibility and conformity are fully satisfied
- Require a Competitor to supply them with such parts or samples as they may deem necessary

3.3.1. All ballast, (weight):

- Must be bolted to the kart as per Declaration/Pre-Tech Form, during all official on-track activity.
- Any non-bolted weight may result in a Disqualification or time penalty.

3.3.2. Numbers:

- Numbers are a Pre-TCI item and must be correctly displayed on all four sides of the kart. Numbers must be legible at speed. Further requirements, (color, size, backgrounds, location, etc.) will be outlined in the events supplemental regulations.
- We recommend Solid black numbers minimum 15 cm high with a 2 cm thick stroke with a yellow background (CIK 2.24).

3.3.3. Stickers:

- As per the Event Supplemental Regulations for each individual event, sponsor stickers may be required and placed in a certain position.
- Drivers who do not display the graphic requirements listed in the Supplemental Regulations will be subject to a position penalty for the first offense. A disqualification may be assessed after the first offense during the event.

3.3.4. Safety Equipment: (CIK article 2.14)

- A Driver must at all times, wear the full equipment as defined in the guidelines and as per Event Supplemental Regulations as insurance regulations may differentiate:

3.3.4.1. Helmet:

- Helmets must comply with 2012 RMCUS Pre-Tech Form, unless the particular Event has increased qualifications.

3.3.4.2. Overall:

- A full race suit which covers the whole body, legs and arms included.

3.3.4.3. Gloves:

- A pair of undamaged race gloves covering the hands and wrists completely

3.3.4.4. Boots:

- A pair of undamaged race boots covering the feet and ankles completely.

3.3.4.5. Neck Braces:

- Are mandatory in Micro Max, Mini Max and Junior Max Classes.
- They must be unaltered and used as intended by manufacturer.

4. Officials:

- Officials will be posted in each individual Event Supplemental Regulations.

5. Briefings:

5.1. Definition:

- The Drivers' Briefing is a meeting organized by the Chief Steward and or Race Director for all Drivers entered in the Event.

5.2. Aim of the Briefing:

- To remind Drivers of the specific points of these Regulations and of the Event Supplemental Regulations concerning the organization of the Event; to remind them of the safety notions, either general, or specific to the circuit used; to give any clarification concerning the interpretation of the Regulations
- All drivers will be solely responsible for ALL information covered at any time during the drivers Briefing.

5.3. The time of the Briefing:

- Scheduling of the meeting will be posted and included on the Official event schedule. Event officials reserve the right to schedule such meetings at their discretion throughout the event.
- The presence of all concerned Drivers is mandatory throughout the Briefing, or as per Event Supplemental Regulations.

6. General Safety:

6.1. Direction of Travel:

- It is strictly forbidden for Drivers to drive their karts in a direction opposite that of the race, unless this is strictly necessary to remove the kart from a dangerous situation.
- This includes, track exit, scale line, hot-pit (if used) and grid areas.

6.2. Use of Track:

- Drivers may use the track only, and only when scheduled to access the track. Drivers are allowed to use the whole width of the track. If the four wheels of a kart are outside the boundaries of the track, the kart is considered having left the track.

6.3. Immobile Karts:

- A driver must remain present, on the track; with their kart for the duration of any on track session should their kart become immobilized, unless instructed otherwise by track officials for safety or medical reasons.
- Crew Members may not retrieve disabled karts unless directed to do so by the Officials.

6.4. Tools:

- It is forbidden to take any tools and/or spare parts on board the kart or use tools on the racing surface.
- It is recommended to always bring tools with your kart to the Post-TCI area.

6.5. Fueling:

- The policy regarding the fueling of karts will generally be outlined in the Event Supplemental Regulations. If restrictions and specific designated areas are employed, violation of these restrictions will be dealt with harshly. If specific designated restricted areas are NOT outlined, competitors will generally be allowed to refuel karts anywhere other than the Grid area and the racing surface. Race officials reserve the right to allow for fueling inside restricted areas at their discretion.

6.6. Stopped Karts:

- Except in cases expressly provided for by the Regulations, no one except the Driver, (and Officials to ensure safety and/or compliance), is authorized to touch a stopped kart.
- Only in the case of a hot-pit area may a driver have assistance with his/her kart with repairs inside the designated area, as per Event supplemental Regulations.

6.7. Closed Track:

- During the course of the event the track may only be accessed by those gaining permission from race or track officials.

6.8. Restarting a Kart:

- During any official track session other than practices, once a driver has crossed the line leading onto the racing surface, that driver may not receive ANY outside assistance to restart their kart. (Exceptions may be made for Cadet Classes and will be addressed in the drivers briefing.)
- In the case of a Hot Grid situation, drivers must reach the grid area under their own power in order to get assistance. A driver may only receive help in the designated grid area and by no more than one person at a time.
- During a Race, a Driver may no longer attempt to restart their Kart once they have been lapped by the lead Kart, except to move to a more safe location, without causing interference on the racing surface.

6.9. Speed Limits:

- A speed limit may be imposed in the pit lane and in the grid area during practice, races and the formation lap.
- Any driver braking this speed limit may be imposed a penalty.
- A judgment of “reasonable speed” by officials may be used in interest of safety.

6.10. Mechanical Malfunctions of a Kart:

- If a driver is faced with mechanical problems during any on track element of an Event, he/she must evacuate the racing surface as soon as possible for safety reasons.

6.11. Collisions:

- If a Driver is involved in a collision, he/she must follow the direction of the Officials with regard to continuing in that element of the Event.

6.12. On track Instructions:

- Driver communications with their crew may not resemble officials signaling procedures. (i.e., colored flags, etc...)

6.13. Communications:

- Any electronic communication system between any Driver on the track and any other person is strictly forbidden

6.14. Leaving the Track:

- Any Driver who intends to leave the track, shall demonstrate his/her intentions in due time and shall ensure that he may do so safely. If a Driver leaves the racing surface, other than at a designated track exit during Practice, Qualifying, or a Race, he/she will re-enter the racing surface at a point as far from the racing “line” as possible and may not re-enter the course at a point that will provide any time or distance advantage.
- It is the Officials decision as to whether or not any advantage was attained by off-course driving and/or course re-entry, and that decision is final.
- Drivers must follow the direction of the Officials.

6.15. Breaching Technical Regulations while on the Track:

- Should a driver's kart become technically non-compliant while on track, it will be the officials obligation to signal for that karts removal. Drivers must obey the signals from officials.
- Karts found to be technically non-compliant upon leaving the track, may be penalized and/or eliminated from the session at the discretion of the technical and or race officials.
- Any driver found altering equipment in the scale line may be penalized or disqualified from the session.
- On track officials and technical officers reserve the right to penalize noncompliant equipment until a kart has been released from the scale area or the post technical compliance inspection area.
- During an Event and at the order of the Officials, a Driver who breaches the Technical Regulations, except during the final lap, must exit the track or racing surface.

6.16. Paddock Vehicles:

- As per, Event Supplemental Regulations.

7. Fuel and Oil:

- As per Event Supplemental Regulations: under the guidelines of the ROTAX MOJO MAX CHALLENGE rules and regulations.

8. Tires:

- As per Event Supplemental Regulations: under the guidelines of the ROTAX MOJO MAX CHALLENGE rules and regulations.

9. Parc-Ferme:

- As per Event Supplemental Regulations: under the guidelines of the ROTAX MOJO MAX CHALLENGE rules and regulations, if implemented.

10. Hot Pit:

- As per Event Supplemental Regulations: under the guidelines of the ROTAX MOJO MAX CHALLENGE rules and regulations, if implemented.
- Hot Pit will not be allowed for the Micro-Max Classes

11. Grid Area:

- The grid area is the area used to put karts into their proper formation for next on track session. This area is also the area used for repairs and adjustments during qualifying sessions utilizing a "Hot Grid". See "Qualifying" for further rules and restrictions.
- Only ONE driver per kart and ONE mechanic is allowed in the "Grid Area" and only with proven passes. No karts/persons are allowed to enter "Grid Area" with any liquids. (Except, water in a clear transparent plastic bottle, for drinking purposes.
- This area will be a sealed and controlled area.
- Re-fueling is generally not allowed in the grid area unless expressively allowed, by the grid officials

12. Pre/Post Technical Compliance Inspection Area

- Only ONE driver per kart and ONE mechanic is allowed in Post-TCI area and only with proven passes. No karts/persons are allowed to enter the Technical Compliance Inspection area with any liquids. (Except, water in a clear transparent plastic bottle, for drinking purposes.)
- This area must be a sealed and controlled area.

13. Signification of flags:

- In the use of lights refer to the Event Supplemental Regulations
- All use of flags are not required, but are outlined below.
- It is the sole responsibility of every driver to know the significance and commands of all flags/lights used by officials at any given event. Repeated failure to obey those signals may result in penalty or exclusion from an event.

**Flag signals displayed at the Finish Line:*

13.1. Red Flag:

- This flag indicates a perceived need for medical attention and or track conditions that require the stoppage of the track session in progress.
- This flag will be waived at the Start/Finish Line when it has been decided to stop an on-track element of an Event. When this flag is displayed, all corners will display waiving yellow. In special circumstances, the red flag may be displayed at another location of the track, pending the location of the hazard. The red flag may also be used to close a track.

13.2. Black and White Checkered Flag:

- This flag must be waived at the Finish Line and signifies the end of an on-track element of an Event.

13.3. Black Flag, generally displayed with kart number:

- This flag waiving will be used to inform the Driver concerned that he/she must exit the track and or racing surface. Should a Driver ignore the instructions of this flag, after passing its display twice, the Driver may be excluded, (disqualified), or penalized as the officials see fit.
- If the driver persists on not removing him/herself from the racing surface after passing its display, the driver may also be assessed a penalty as harsh as suspension from the series and all RMC future events.

13.4. Black Flag with Orange Disc, (Meatball), generally displayed with kart number:

- This flag should be used to inform the driver concerned that his/her kart has mechanical problems likely to endanger him/her-self or others and means that he/she must exit the racing surface.
- Should a Driver ignore the instructions of the Meatball flag, after passing its display twice, the Driver may be excluded, (disqualified), from that on-track element of the Event.

13.5. Rolled Black Flag:

**Replacing the Black and White divided diagonally flag; a rolled black flag, pointed at the Driver concerned, and may be used with the same intention.*

- A rolled black flag indicates a warning from officials and maybe followed by a waived black flag. A rolled black flag does not signify the command to leave the racing surface.
- This flag serves as a warning to the Driver concerned that he has been reported for unsportsmanlike behavior. Should the behavior not be rectified by the Driver concerned after receiving this flag, the Driver may be removed from that on-track element of the Event and penalized.

13.6. White Flag:

- This flag will be waived and will be used to indicate the final lap of an on-track element of an Event.
- Every effort will be made to display white flag signifying the leader is beginning the last lap. However, the white flag is a courtesy flag, and not mandatory.

13.7. White Flag and Checkered Flag Rolled separately Displayed vertically together:

- This combination of flags indicates two laps remaining in the race.
- The use of this signal is not mandatory.

13.8. Transponder Flag, (black with yellow cross), generally displayed with kart number

- This flag indicates there is a problem with the scoring system reading a particular drivers transponder. A driver should exit to the hot pit area, or any area deemed sufficient by the race director, to receive an alternative transponder in order to accumulate an official time. The location of this alternative transponder is not relevant, as long as it is a consistent location from lap to lap. The efforts made by officials to get a driver an alternative transponder and official time are considered a courtesy and are not required.
- It is the responsibility of the driver to make sure they have a working and properly mounted transponder at all times.

13.9. Red and Yellow divided diagonally, (Re-Start Flag) this flag:

- This flag will signify the officials desire to restart a race after the start has been signaled. The flag will be waived at a safe point on the track prior to the completion of the first lap. Drivers shall slow safely and re-align themselves into their original starting positions assigned at the original start of the race. Formation lap regulations will apply as the field circulates the track in preparation of another start. The previous start will be null and void and the complete race distance will follow. Penalties may be assessed to offending drivers at the race director's discretion.

13.10. Yellow Flag:

- This is a signal of danger and should be shown to Drivers in two ways with the following meanings
- Should normally only be shown at the Officials' post, immediately preceding the hazard.
- Overtaking is not allowed from the point at which the flag is displayed until clear of the incident or kart that drew the yellow flag. Should a driver mistakenly overtake another driver in a section of the track that is "under yellow flag conditions", and voluntarily relinquish that position back to the overtaken driver prior to the completion of the next lap, the offending driver MAY avoid penalty at the sole discretion of the race officials.

13.11. Standing Yellow:

- Standing yellow flag(s) signifies a minimal risk ahead. Drivers should approach with caution. Overtaking is not allowed from the point at which the flag is displayed until clear of the incident or kart that drew the yellow flag. A 10 second penalty may be imposed on kart(s) overtaking another kart in a section of the track that is under yellow.

13.12. Waiving Yellow:

- Waiving yellow flag(s) signifies considerable risks or danger ahead. Drivers should slow down and approach with extreme caution.
- Overtaking is not allowed from the point at which the flag is displayed until clear of the incident or kart that drew the yellow flag. A 10 second penalty may be imposed on kart(s) overtaking another kart in a section of the track that is under yellow.

13.13. Yellow Flag with Red Stripes:

-This flag is optional or a courtesy flag and not always available. It signifies a significant reduction in traction or grip on the racing surface due to the presence of foreign materials. It should be displayed until the entire field has been made aware of the hazard. It is permissible to overtake another driver when this flag is being displayed.

13.14. Blue and Red Flag, (double diagonal):

-This flag will be waived as an indication to a Driver that he/she is about to be overtaken, and the Driver must give way.

-This flag signifies a command, not a request. Driver failing to yield to overtaking drivers immediately may be removed from the track session via a black flag

13.15. Green Flag:

-This flag indicates the start of an on-track element of an Event.

-A green flag also indicates that normal racing conditions apply and may be displayed at the observation post immediately following a section of the track that was under a yellow flag condition.

14. Instructions and communications to Drivers:

-All classifications and results of an on-track element of an Event as well as any decisions of the Officials will be posted on the official posting board, unless otherwise detailed in the Drivers' Briefing

-All driving infractions should be relayed to the driver and or mechanic in the scales area.

15. Event:

-Specific Supplemental Regulations may dictate alterations to any Event Race Format. At any time, the Event Organizer reserves the right to alter the format as detailed in these regulations, and/or Heat Races, Number of Groups, and/or size of Groupings, to accommodate schedules for the efficient operation of each Event, as long as it adheres to the RMC Sporting and Technical Regulations.

15.1. Quiet Pit Rule:

-Starting or running Rotax engines anywhere or anytime during the entire event while the quiet rule is in effect, unless expressly authorized by Technical or Race officials is prohibited.

-Engines may be started upon signal given by the Grid Steward prior to entering the track for an official track session. This may only be done on the Grid, with the kart on the ground. Rear tires must remain in contact with the ground.

- Ambient engine temperatures may be verified upon entry to Grid area.
- Violations to the Quiet Pit Rule will result in a 10 second penalty for associated competitive element.
- Violations during practice prior to qualifying may result in up to a 10 second penalty at the official's discretion.

-Second violation may result in exclusion from event with loss of earned finish position to that point.

-Under special circumstances, drivers may be granted a 'courtesy start' by the Chief Technical Director. This must be performed in a designated area, under Tech Officials supervision, engine temperature rules will still apply to all competitors. This is in-place for diagnostic checks only.

-NOTE: Abuse of this exception will result in immediate suspension of this privilege!

15.2. Controlled Practice:

- Official practice sessions will be controlled by category, and in some cases separated by Groups within a Category, and will be outlined in each RMC Event Schedule.
- During all official on-track sessions, including official practice days and practice sessions, declared engines and chassis must only be used.

15.3. Interrupting Practice:

- The Officials may interrupt Practice as often and as for as long as deemed necessary for the clearance of the track or the removal of a kart(s). Further, if, in the Officials opinion, the stop is deliberately caused by a Driver, he/she may be penalized.
- To discourage reckless driving during practice, some events keep the clock running during track clearing process, if allotted time expires, before track is clear, session is complete.
- Considerations may not be made for groups relinquishing practice time due to the need to clear the track, at the discretion of the race officials.

16. Timing and Scoring:

- It is the sole responsibility of competitors to provide beacons for their data acquisition systems. Beacons may only be placed trackside with track official's permission and will be only in a designated area. The placing of additional beacons is strictly prohibited.
- A competitor's personal data will NEVER be considered for official scoring purposes.

16.1. Scoring

- Results for all official track sessions will be considered pending until signed by the proper race officials and posted as "Official". The posting of results does not automatically deem results to be final. See Event Supplemental Regulations for detailed procedures affecting specific events.

16.2. Transponders

- Each Competitor is required to bring a transponder to each event. Transponder presentation will be considered a part of Pre-Technical Compliance Inspection.
- Transponder rentals will not be a responsibility of Event Organizers.
- No single transponder may be shared by more than one Driver for any reason, unless authorized by the timing and scoring officials.
- Each Driver is solely responsible for the proper functionality of the transponder assigned to them, whether rented or owned.
- The Driver is responsible for mounting the scoring transponder in a manner optimal for scoring system function and preventing loss of the transponder on the track, as per RMCUS Technical Supplemental Regulations.
- Any driver failing to have on board a working transponder, during the practice session(s) requiring a transponder may be subject to penalty. Forfeiture of a practice session or being relocated to the slower of two groups may be imposed.
- Transponder replacement during qualifying, and or hand scoring during a race event, in the event of a transponder failure or absence for any reason, will be considered a courtesy by the scoring officials/race officials, and is not their obligation.

17. Qualifying:

-Qualifying will be for a specific length of time, designated in the Event Supplemental Regulations and/or Official Event Schedule. Only lap times accumulated during these designated times will be considered

17.1. Time:

-Any lap time acquired will be considered, as long as that lap was initiated prior to the expiration of the designated time period. (Example: For a 10 minute qualifying session, a lap time will be considered if that lap was initiated prior to the 9:59 mark of the session.)

-Any kart present on grid will be considered started. Karts not accumulating a time on track will be started at the back of the next on track session. Practice times will be considered if multiple drivers fail to achieve times.

-Only official scoring system data will be considered.

-Should multiple drivers achieve the same lap time; the drivers 2nd fastest lap time will be considered, and so on....

-Should a driver not have a working transponder during qualifying, track officials at their discretion, may allow a driver to introduce an additional transponder, or offer a replacement transponder to a driver. The location and fastening of this replacement transponder is incidental. This will be considered a courtesy and is not the obligation of the track officials. Under no circumstances will a drivers own data be considered.

17.2. Groups:

-Groups will qualify by class or groupings as per Official event schedule.

-Drivers will only be allowed to qualify during their specifically designated qualifying session.

17.3. Grid:

-If a "Sealed Grid" procedure will be instituted for qualifying, it is defined as follows

-Grid area will "Seal" at the time the Green flag waves or start of the qualifying session is indicated by the Grid Steward. At that very specific point in time, no drivers, karts, mechanics, parts or outside materials of any kind, or additional personnel, will be permitted to enter the grid area. NOTHING is allowed to enter the grid area or be used by a driver that was not present on the grid prior to the time the grid sealed.

-No fluids, weights or non-compliant parts are allowed in the grid area.

-No fuel is allowed on the grid.

17.4. Hot-pit:

-Only one mechanic per driver will be allowed onto the grid area with proper credentials.

-If a "Hot Pit" situation is indicated, drivers will be allowed to take the track at their discretion, at any time during the designated qualifying session. Drivers may exit the racing surface and re-enter the grid area at their discretion.

-Re-entry to the track will only be allowed by the Grid Steward.

-Drivers re-entering the track against the Grid Stewards' commands may be penalized and may forfeit lap times acquired during that stint

17.5. Session:

- Once a kart enters the racing surface by crossing the red line at the track entrance, if a kart becomes immobilized, that driver may not receive any outside assistance or use materials/tools, unless they reach the grid area under their own power, and doing so safely at the discretion of the race officials. If track officials touch a competitor's kart, that driver's session will be considered over and only times previously achieved will be considered for qualifying. (Exceptions may be made for cadet drivers at drivers briefing)
- Any driver cutting the track for any reason, and bettering their lap times during qualifying, will end their qualifying session and no further achieved lap times will be considered.
- Any driver circulating the track surface and interfering with another driver(s) may be subject to penalty

17.6. Exit:

- Drivers no longer wishing to achieve qualifying times may exit the racing surface towards the scales at any time during the qualifying session. Once a driver enters the scales line, they may no longer re-enter the racing surface to achieve qualifying times.

17.7. End:

- At 2 minutes prior to the qualifying session ending, the grid entrance from the racing surface will close. At that point, drivers wishing to no longer achieve times will be required to exit the track towards the scales.
- Drivers in the scales line are not allowed to alter karts or use tools, including air gauges, until they have cleared the scaling process.
- Any driver present on the grid at the end of the Qualifying Session must be directed immediately to the scale area under the supervision of race officials.

17.8. Split classes:

- In the case of a class being separated into two or more groups for any Practice or Qualifying session, where Drivers are assigned to a Group by the Officials, Drivers may only participate in their assigned Group.

17.8.1. Groups within a Class:

- In the case of a class being divided into two or more groups, the groups will be divided into equal-sized groups. Lap times from Groups that make up a class will be combined to determine the fastest lap times for classification in that class.

17.8.2. Determination of Groupings: (Method A or B)

A: Groups may be determined by the times achieved by each Driver, as a result of their participation in the designated Non-Qualifying Timed Practice. Karts are required to be technically compliant for these sessions.

-These times will be used to determine assigned Practice and Qualifying Groups for the balance of that Event according to Event Supplemental Regulations. From this process, the slowest Practice times will make up Group A and will take the track first for Practice and Qualifying, and the fastest Practice times will make up Group B and will take the track second for Practice and Qualifying.

B: Groups will be determined based on Kart Racing numbers. (Odd/Even)

17.8.3. Grouped Driver(s) Withdrawing from an Event prior to Qualifying:

-Should one or more Drivers withdraw from competition prior to Qualifying, groups may be re-assigned to equalize participation in each group. Drivers may only participate in their assigned Group.

17.8.4. 101% Grouping Rule:

-If a given class is divided into more than one qualifying group, and those groups take to the racing surface with significantly different track conditions, and those conditions cause the fastest lap times from each group to be more than 101% apart, then the following line up formula will be used. 1st place will go to the fastest time in the faster Group, (fastest overall), 2nd place will go to the fastest time of the slower Group, 3rd place will go to the second fastest time in the faster .Group, 4th place will go to the second fastest time of the slower Group, 5th place will go to the third fastest time in the faster Group, and so on. This decision is at the Race Director's discretion.

17.8.5. Driver(s) Participating out of Group:

-In the case of a Driver found participating in a Qualifying Group not assigned to them, the Driver will be immediately removed from the track, and any lap times from his/her participation in that unassigned Group will not be considered as official lap times. In this case, the Driver will not be allowed to participate in their assigned Group, and they may receive a time of "No Time" for official classification.

17.9. Hot Pit Lane

-If a Hot Pit area is established; as per Event Supplemental Regulations: under the guidelines of the ROTAX MOJO MAX CHALLENGE rules and regulations.

-This will be in conjunction with a sealed grid area.

-Only approved drivers and mechanics may enter area.

17.9.1. Entering the Track:

-Driver may only enter the racing surface at the direction of the Grid Steward. Drivers should enter the track and get up to racing speed in a timely manner. Any driver who disobeys the direction of the Grid Steward upon track entry may be subject to penalty. If no Grid Steward is present at the track entry point, driver are expected to enter the track with caution and only if, clear track spacing exists.

-Drivers entering the racing surface in an unsafe manner may be subject to penalty.

18. LCQ:

-If an LCQ has been established; as per Event Supplemental Regulations

-A defined number of drivers, who do not qualify directly to the pre-final after Qualifying Practice, may participate in the Last Chance Qualifier. This race will transfer a defined number of drivers into the pre-final. Number of laps will be according to the length of the track, according to the organizers.

19. Starting Grid:

19.1. Posting of Positions:

-At the end of Qualifying, a list of the Qualified Drivers, as well as the starting grids for the Pre-Final will be officially posted.

19.2. Withdrawing from a Start:

- Any Driver whose kart is unable to take the start for any reason whatsoever, or who has good reason to believe that his/her kart will not be ready to take the start at the scheduled time, must inform the Officials as soon as possible.
- If a kart/driver is missing from the grid before or after leaving the grid, that particular grid spot will be replaced by the driver directly behind him (taking up the missing drivers spot), with exception to the front row.

19.3. Starting Grids:

- The grids after Timed-Practice and or Qualifying will be drawn up in accordance with the fastest time achieved by each Driver. Should one or several Drivers achieve the same time; the tie will be settled on the basis of their second fastest time, and so on.
- The grid for the final will be drawn up in accordance with the pre-final finishing order.

19.4. Pole Position:

- The Pole Position Driver of each grid will have the choice of the pole position, (on left or right side of the track), provided that he/she advises the Officials as soon as he/she reaches the Grid Area. This choice will only modify the first row, to the exclusion of the others.
- Failing this, the Pole Position Driver will take the start of the Race from the grid position which was the pole position the previous year, or if it is a new circuit, on that which is designated by the Officials, or designated in the Supplemental Regulations.

19.5. Access to the Grid Area:

- Access to the Grid area will remain open for qualifying, heat races, pre-finals, and LCQ's and Main events until the time that the Grid Steward indicates the start of that specific track session. This is usually done by the waiving of a green flag by the Grid Steward. At that specific point in time, no drivers or their karts will be allowed to take to the Grid area and participate in that on track session.

19.6. Official Driver Starting:

- Any driver who is present with their kart on the Grid area prior to the beginning of that specific track session will be considered a starter. Any driver meeting this requirement, will be allowed to take to the track up until the time at which the field comes around past the track entrance the first time under race conditions (after the start of the race). Drivers will have until the "FORMATION Line" designated in the drivers briefing, on the formation lap to regain their earned starting position, or must start or join at the rear of the field. Once the grid has sealed for that specific track session, no outside tools or supplies will be allowed to enter the grid area.

20. Race Distances:

- The number of laps for each element of each class' Final Phase will be supplied on each Event Schedule as per Event Supplemental Regulations; under the guidelines of the ROTAX MOJO MAX CHALLENGE rules and regulations.

21. Starting procedure:

- As per Event Supplemental Regulations: Each event may adopt their own starting procedures.

21.1. Start Signal:

- The Start Signal shall be given by way of lights, or by flags, or a series of flags, as instructed in each Driver Briefing, and per Event Supplemental Regulations.

21.2. Type of Start:

-The type of start is rolling. The grid will be constituted of two lines of karts. Le Mans type starts are forbidden.

21.3. Official Starter:

-The Chief Starter or Race Director will give the start.

21.4. Warm Up Lap

-Laps given to drivers preceding the formation lap prior to the start of a race. The number of Warm up laps will be designated at the Drivers briefing. Drivers must maintain their starting order and are not allowed to pass other drivers on the warm up laps unless a driver falls out of formation due to experiencing troubles.

21.5. Formation Lap

-The Formation lap is the lap where drivers are to line up and get into formation to prepare to start a race. The Pole driver sets the pace for this lap and must carry a "reasonable pace" allowing all drivers, not experiencing troubles, to catch the end of the field. All drivers must be in their earned starting position at the time they reach the Formation Line on this lap, or they must fall into the lineup at their given location, providing it is not ahead of their earned starting position.

-Drivers are not allowed to advance past the Formation Line.

21.6. Formation Line

-The Formation Line is a Red line painted across the track, signified by cones trackside, and located approximately 3/4 of the distance around the track. All drivers must be in their earned starting positions and in formation, by the time they reach this line on the Formation Lap, or fall into the lineup at their given location, providing it is not ahead of their earned starting position.

-Failure to do so will result in penalties.

-Should a start be aborted, drivers will have another chance to regain their earned positions prior to reaching this line. Formation lap rules will apply.

21.7. Starting Lanes:

-Two white lanes will be painted on the track approximately 75 yards prior to the Acceleration Line. On the Formation Lap, drivers must drive into their respective lanes and remain in their lanes until the indication of the start of the race.

-Drivers crossing outside of these lanes prior to the start of the race being signaled will be penalized with time penalties. A 3 second penalty for 2 wheels out and 10 seconds for 4 wheels out will be assessed post-race.

21.8. Acceleration Line

-The Acceleration Line is a yellow line painted across the track, signified by cones trackside, and will be the first line reached by drivers while in their starting lanes. The acceleration line is the point at which karts may accelerate to take the start of a race, on the Formation Lap. The Acceleration Line is the beginning of the zone at which a race can be started.

21.9. Starting Line:

-The Starting Line is a yellow line painted across the track, signified by cones trackside, located 25 meters down track from the Acceleration Line, and will be the second line reached by drivers while in their lanes. The Starting Line indicates the end of the zone at which point a race can be started

21.10. Starting Procedures:

-In the Drivers Briefing, drivers will be notified of the number of warm up laps given to precede the formation lap. All drivers are required to enter the starting lanes as they materialize on the formation lap.

-While completely in the lanes, karts should approach the Acceleration Line in proper formation, and proceed at a reasonable speed. Karts are allowed to accelerate at the Acceleration Line and must remain in their respective lanes until the start of the race is signaled, by waived green flag or specified lighting sequence. At that specific point in time that the race start is signaled, race conditions apply, allowing karts to break their starting formation and or lanes. Should the off pole driver be ahead of the Pole driver, by his own power, at the crossing of the Acceleration Line, he will be considered to have "Jumped the Start" and may be assessed a 10 second post-race penalty. Should the Pole Driver accelerate prior to the Acceleration Line under his own power, he will be considered to have "Jumped the Start" and may be assessed a 10 second post-race penalty. Once past the Acceleration Line, all drivers are allowed to accelerate without penalty. All drivers may break formation and exit their respective lanes at the signal of the beginning of the race. The signal to start a race will be given at some point when the front row is between the Acceleration Line and the Start Line.

21.11. In general, one attempt will be given to start races.

-Drivers violating these procedures may be penalized rather than race restarts being granted. This decision is at the Race Directors discretion and will be deemed final.

-Race officials will always have until the completion of the first two laps to call for a race restart if they are not satisfied with a signaled start.

21.12. If there are no lines painted:

-If there are no lanes provided, the Acceleration line and start line will be signified by yellow paint and cones track side. Cones may be placed down the center of the track leading to the acceleration line. Karts will be expected to stay in line until the start of the race has been signaled. Karts jumping out of formation early may be subject to a 10 second penalty. Specific procedures may be clarified in supplemental regulations or covered in the drivers briefing.

21.13. In-operative Karts on track:

-If a driver stops for any reason during the formation lap, and is unable to regain their earned starting position prior to the formation line or take the start at the rear of the field, that driver will have until the race leader puts them a lap down under green conditions to resume racing. Entry onto the track after that point will not be allowed.

21.14. In-operative Karts on the Grid:

-Drivers delayed in the grid area may take to the racing surface up until the point that the race leaders pass by the track entrance the first time under green. Drivers must follow the commands of the Grid Steward. The completion of warm up and formation laps is not required.

21.15. Regain one's position:

-It is forbidden to use any course other than the track used during the race, (no cutoffs), unless directed to do so by the Officials.

-It is the Driver's responsibility to regain their starting position as long as the maneuvers are completed without incident against other drivers, and before reaching the Formation Line.

21.16. Immobilized Driver:

-If he/she considers that a Driver has been immobilized as a result of another Driver's mistake, the Chief Starter or the Race Director may stop the Formation Lap and start again the starting procedure on the basis of the original grid, or allow the impeded Driver to regain his/her position. The new starting procedure will be ordered immediately, or within 30-minutes, according to the circumstances. The Officials may inflict a penalty upon the offending Driver(s).

-Work on karts may or may not be allowed in this case, as directed by the Officials.

21.17. Start of Racing Conditions:

-As soon as the signal to start has been given, race conditions apply. Drivers may break the starting formation and exit their lanes when the start signal is displayed.

21.18. Jump Starts:

-A jumped start may be considered when:

- The pole driver accelerates prior to crossing the Accelerating line under their own power.
- The off pole driver crosses the Acceleration line ahead of the pole driver, under their own power.
- Trailing driver(s) in the formation break their lanes prior to the signaling of the start of a race.

-Drivers deemed to have jumped the start of a race will be penalized as prescribed in the rules. Race starts will be subject to video review (using only official's cameras) at the discretion of the race officials.

21.18.1. Drivers that have taken the Start ahead of their assigned starting spot:

-Any driver that has taken the start of a race ahead of their assigned position, may be assessed a post-race penalty, equal to the number of position gained plus 3 positions.

22. Stopping a Race, Qualifying or Practice:

-The following procedures are generally followed unless spelled out differently in Event Supplemental Regulations.

22.1. Conditions necessary to stop a Race:

-In general, a race may stop because of:

- The perceived need for medical attention
- Track blockage prohibiting drivers from continuing
- Danger caused by weather or other conditions making it Dangerous to continue
- At the discretion of the race director

-The decision to stop a race is at the sole Discretion of the Race Director. Generally the red flag will be flown at the start finish line or other location described in the drivers briefing. Drivers are to slow down immediately coming to a complete stop in the area designated at the drivers briefing, or as per track official's instructions. Once a red flag condition has been determined, yellow flags may be shown at corner observation posts, or red lights may be illuminated around the circuit.

22.2. During Practice:

-Should practice session(s) be stopped by red flag conditions, those session may or may not be resumed or completed

22.3. During Qualifying:

-All classes will be guaranteed a minimum of 75% of the original Qualifying time posted in the Event Schedule, of green flag conditions for Qualifying.

22.3.1. Should the session be stopped prior to the 75% of the allotted time in the Event Schedule:

- The session will resume after the reason for the red flag is cleared, and conditions are again safe to continue.
- The class will be allowed to resume Qualifying until the minimum 75% of allotted time in the Event Schedule has expired.
- Under no circumstances, may karts be worked on during the stopping of the clock during qualifying by a red flag.

22.3.2. Should the session be stopped after the minimum 75% of allotted time in the Event Schedule have expired:

- The session may not resume, and may be considered complete.

22.4. During Races:

-In the event a red flag is thrown during a race, the classification of the race will be the classification at the end of the lap prior to that during which the signal to stop the race was given. All karts must come to a stop in the location indicated in the drivers briefing. Drivers will be instructed by race officials as to the procedures to follow.

22.4.1. The procedure to be followed varies according to the number of laps completed by the Race leader before the signal to stop was given:

- Less than 2-laps. If the Race can be restarted, Article 23.1 (below), Case A will apply.
- More than 2-laps, but less than 75% of the distance scheduled for the Race, (rounded up to the nearest whole number of laps). If the Race can be restarted, Article 23.2 (below), Case B will apply.
- 75% or more of the distance scheduled for the Race, (rounded up to the nearest whole number of laps). The race may be considered complete. Karts may be directed to the scale area for post-race procedures. Full points will be awarded. The finish order will be considered in the order of the previously completed lap, with potential penalties being assessed for karts involved in the incident that drew the red flag.

23. Restarting a race:

23.1. Case A:

- If less than 2-laps have been completed, a new start will be given within 30-minutes after presentation of the red flag. A race has reached 2-laps completed when the race leader crosses the finish line completing 2 laps under green conditions. The length of the new Race will be the full original race distance. The original start will be deemed null and void and the new race order will be the same as the original race order. In extreme cases, sanctions may be applied.
- In this case, work on karts may be permitted only at the direction of the Officials, and only in the location directed by the Officials.
- You may consider sending Karts back to pits under some circumstances, requiring those karts to reach the grid area in time to make the restart.
- Any driver who presented themselves on the grid at the appropriate time with the intent to start the original race will be eligible for the new start.
- Any driver perceived to have needed medical attention by the officials, and causing the red flag to be given, will not be allowed to restart that on track session.

23.2. Case B:

- If more than 2-laps have been covered, in most cases a new start will be given immediately, barring conditions, or within 30-minutes after presentation of the red flag.
- The length of the new race will be equal to the difference between the scheduled number of laps and the number of laps covered.
- The Drivers who have crossed the Finish Line at the end of the lap prior to that on which the Race was stopped when the red flag was shown will be allowed to take the new start. Grid positions will be determined by the finishing order at the end of the lap before the one in which the race was stopped.
- Race restart will be a single file rolling restart.
- Working on karts may or may not be allowed in this case, pending instruction by the Officials.

23.3. In either Case A, or Case B:

- The kart(s) causing or directly involved in the incident causing the red will be placed at the back of the restart formation, if allowed to restart by the Officials.
- Any driver causing a red flag condition due to their perceived need for medical attention by the race officials will not be allowed to take the re-start of that session.

23.4. In either Case A, or Case B:

- If the reason for stopping is solely due to severe weather, and only for a Race, 15-minutes will be allowed to make any adjustments to karts, within the Technical Regulations, and only within the controlled environment as instructed by the Officials. Backup karts/motors will not be allowed under this condition.

23.5. In either Case A, or Case B:

- The Officials may advance the schedule to the next group during the stopped element.

24. Red Flag Procedures:

- All work will be confined to within the announced, controlled area only as per the Event Supplemental Regulations.

24.1. Working on karts:

- Working on karts during red flag conditions of a Race may be prohibited, unless provided by the Officials.
- If the Officials provide that work will be allowed on karts, the following conditions will be applied.

24.1.1. Persons:

- The only persons allowed to intervene on a kart are the Driver himself and his appointed mechanic, the holder of the appropriate pass.
- At the appreciation of the officials, a mechanic may be substituted by another mechanic to make the repairs.

24.1.2. Allowances:

- It will be allowed to introduce spare equipment, as allowed by the Officials. The officials can allow a driver and his mechanic to replace damaged parts only, not make tuning adjustments, parts may be changed with "like for like" parts (example axles may be replaced with same stiffness as damaged).
- Under no circumstances can anything be "passed" into the controlled area by an outside party for any reason, under pain of being excluded from the remainder of that Race.
- All replacement parts can be obtained and sent to the Post-TCI area.
- Refueling will only be allowed under complete restart conditions and at the direction and allowance of the Officials.
- Tire pressure may be adjusted in these circumstances.
- Neither Chassis nor motor changes will be allowed after original start orders have been given.

24.1.3. Time Frame:

- Drivers that have not completed their work within the allotted time-frame, will be placed at the back of the grid for the re-start, (only if their work is completed before the order is given to start the re-start, otherwise normal late start procedures will apply). Their start position will be filled from the grid spot directly behind them and so on.
- In the case of an open grid spot, that particular grid spot will be replaced by the driver directly behind him (taking up the missing drivers spot), with exception to the front row.

25. Finish:

25.1. The signal indicating the end of the Race(checkered flag):

- A Checkered flag shall be given on the Finish Line as soon as the leading kart has covered either the full race distance or the greatest distance during the time scheduled for the Race.

25.2. Ending the Race other than the Scheduled Distance:

- Should for any reason other than under Article 22, the signal indicating the end of the Race will be given before the leading kart completes the scheduled number of laps or before the prescribed time has elapsed, the Race will be deemed to have finished when the leading kart last crossed the Finish Line before the signal was given. Should the signal indicating the end of the Race be delayed for any reason, the Race will be deemed to have finished when, under normal circumstances, the end of the Race would have been decided if there had been no delay, (scheduled distance).

25.3. Direction of Karts after the Finish After having received the signal indicating the end of the Race:

- All karts should directly go to scales, without an unnecessary delay, without performing donuts, without stopping, without cutting the track, and without any outside assistance, (except that of Officials, if necessary).
- Any classified kart unable to reach the scales and tech area by its own means will be placed under the exclusive control of the Officials, who will supervise the taking of the kart to scales and tech in a regular manner.

26. Race Winner

- The winner shall be the competitor that covers the scheduled distance of a race in the least time, or the greatest distance within a scheduled time for a race, and at that point receives the checkered flag.
- The Checkered flag normally shall be displayed first to the winner completing the scheduled distance or time of the race, and then to the other finishers as they cross the finish line.
- Should the Checkered flag be displayed before the scheduled distance or time has been completed, the official number of laps or time shall be as at the time the checkered flag is first displayed.
- Should the Checkered flag be displayed after the scheduled distance or time has been completed, the race will deemed to have finished when, under normal circumstances, the end of the race would have occurred.

27. Overall Race Finisher:

- In order to be classified a race finisher; a kart must have completed a minimum of 75% of the total number of laps completed by the winner of the race. Only those laps completed at the time of receiving the checkered flag or the end of the race will be counted.
- Finishing positions shall be determined according to the number of laps completed regardless of whether or not a kart is running at the display of the checkered flag.
- Karts completing the same number of laps shall be ranked according to the time taken to complete those laps. Karts running on the track at the time the checkered flag is first displayed must pass the checkered flag under their own power after display of the checkered flag in order to be credited with the lap.
- Karts that receive the Start Signal and fail to complete the first lap of the race and any laps thereafter shall be classified as failing to have finished the race with a designation of "DNF" in the official results.
- Drivers having received a checkered flag must slow down and exit the track to the pits and not again pass the finish line, unless directed to do so by the race officials. Unauthorized passing of the finish line may result in penalties and of fines at the discretion of the officials.
- Drivers will be scored in the following order:
 - Race Finishers
 - Drivers classified as DNF (Did Not Finish)
 - Drivers classified as DNS (Did Not Start)
 - Disqualified
 - Drivers who are disqualified will be scored with 0 points.

28. Crossing the Start/Finish Line

- A kart crosses the finish line when any portion of the kart first intercepts the vertical plane of the finish line.
- Pushing a kart along the track to cross the finish line is prohibited, and will entail immediate exclusion

29. Wet Race, rain tire selection:

- During any official track session, the use of rain tires is prohibited until race officials declare a "wet race".
- From this point forward for the remainder of the day, the use of rains or slicks will be at the sole discretion of the driver.
- In the event a "Wet Race" is declared after the race day schedule has started, up to a 15 minute delay may be granted for the first group affected, drivers to make their decision and change tires. No further delays will be given in the schedule.
- Drivers may enter the grid with slicks and wet tires in their possession. Installation is allowed on the grid.
- Drivers will be expected to be ready at the appropriate time with their tire choice made.
- Drivers are responsible to be ready to take to the track at the appointed time. The appointed time is the specific moment in time the Grid Official indicates the track session is Green and karts may enter. Any driver not ready to take to the track at this time, due to tire mounting/choice, may be required to take the start at the rear of the field. Late entries onto the track will be arranged at the rear of the field in the order they take to the track.
- Drivers are responsible to be ready to take to the track at the appropriate time.
- Once the grid "seals" indicated by the command to take the track, additional tires and or anything else, will not be allowed to enter the grid. Standard sealed grid procedures apply.
- Should the original declaration of a "wet race" be made with a group on the grid, the 15 minute delay may be imposed. During this exact circumstance, the only allowed changes made to a kart on the grid, other than the changing of wheels and tires, will be the moving of rear hubs to meet bodywork requirements. No other adjustments are allowed.
- The number of rain tires allowed and their requirements will be covered in the events Supplemental regulations.
- Race officials reserve the right to remove a driver from the track should their choice of tires create a dangerous situation. This decision by the race officials may not be protested.

30. Scale Procedure:

- The official scale readings will be deemed official and final.

30.1. Occurrence:

- After the Non-Qualifying Timed Practice (as per Event Supplemental Regulation), the Qualifying Practice, the Last Chance Race, the Consolation Final, the Pre-Final or the Final, each kart must be weighed. If the kart is unable to reach the Weighing Area by its own means it will be placed under the exclusive control of the Officials, who will take it there or have it taken there, and the Driver shall report to the Weighing Area as soon as he returns to the scale area, so that his weight may be established.

30.2. Kart:

- No solid, liquid or gaseous matter or substance of any nature whatsoever may be added to a kart, placed on it or removed from it before Weighing (except by an official within the framework of his official duties).

30.3. Persons:

- Only Officials may penetrate in the Weighing Area. No intervention whatsoever is allowed in that Area unless it has been authorized by these Officials. This includes the introduction of tire pressure gauges.

30.4. Penalty:

-Violations to these rules may cause drivers to be penalized. Most offenses will be considered as a "failed scale requirements" penalty. Other penalties may be imposed as officials deem appropriate.

30.5. Location:

-The Organizer shall place the scales at the end of the exit lane and near the Post-Technical Inspection area to ensure control of the area, and must provide for sufficient personnel to ensure the placing of the kart on the scales. Mechanics will be kept away from the karts until the Weighing Procedure of their karts is over, unless authorized by an official. The location of this area must be a controlled location.

30.6. Weight:

-If the weight of a Driver and of his kart is under that specified in the Technical Regulations, the result will be communicated in writing to the Driver, and the kart and its Driver will be excluded from the session concerned (Disqualification).

30.7. Driver:

-Drivers may be allowed to drink (a reasonable amount) of water while in the scaling line. This is only allowed from a clear plastic bottle and with permission from race /scale officials. Any driver dumping water on their person or suit will have 2 lbs. added to their minimum required weight.

31. Incidents:

-Incident: means a fact or a series of facts involving one or several Drivers (or any Driver's action reported to the Stewards by the Race Director or noted by the Stewards and reported to the Race Director inquiry), who:

- Provoked the stopping of a practice, qualifying or race
- Violated these Sporting Regulations, supplemental regulations and/or code of conduct
- Had jumped the start
- Have not respected flag signaling
- Have caused one or several karts to take a false start-Have caused a collision
- Have forced another Driver out of the track-Have illegally prevented a legitimate passing maneuver by a Driver(s)
- Have disregarded the instructions of the officials
- Have illegally impeded another Driver during a passing maneuver.
- Have caused a collision of kart and/or person(s) after the checkered flag has been displayed. In this case, the offending Driver will be removed from the event, regardless of when the incident occurred.
- Gained position(s) as a direct result of contact initiated.

31.1. If in the opinion of the Officials:

-A Driver(s), (and/or any persons associated with him/her), is found to cause incidents above, or have shown any retaliation against any other persons associated with an Event after a Checkered Flag, that Driver(s) may be immediately excluded, (disqualified) from the most recent on-track element of the event, and may be sanctioned further discipline, up to and including exclusion from the Event.

31.2. If a Driver(s) is involved in a collision or an incident:

-If he/she was informed of this by the Officials within 30-minutes after the end of the Race, he/she must not leave the circuit without the agreement of the Officials.

31.3. If an incident was caused during a Qualifying Practice or Qualifying Session:

-They shall proceed to the cancellation of the three fastest times which the Driver achieved in the session concerned. However, considering its serious nature, the Officials may decide, of a sanction they deem appropriate and customary for the incident.

31.4. Use of Video or electronic system likely to help make a decision regarding incidents:

-May be used according to the Event Supplemental Regulations.

31.5. Careless:

-Departing from the standard of a reasonably prudent, competent driver and/or reasonable personal conduct. *Penalty #1 through #9

31.6. Reckless:

-Performing an act or omission which creates an obvious and serious risk to others, without due consideration of the consequences. *Penalty #2 through #9

31.7. Dangerous:

-Performing an act or omission that creates an obvious and serious risk to others and with deliberate disregard of the consequences. *Penalty #5 through #9

31.8. Penalties:

-The Penalties that follow apply to driver conduct as well as personal conduct for any person attending the event

1. Number of positions gained/loss as a result of contact.
 2. Number of positions gained/loss as a result of contact plus penalty positions.
 3. Place or Time Penalty (up to a 10 second penalty or 3 position penalties, etc.)
 4. 1 Lap Penalty
 5. Exclusion from TQ/Heat/Pre-Final or Final
 6. Exclusion from the Event
 7. Suspension for One Race + No points for that Event. Must leave the premises*
 8. Suspension for One or More Races + No points for that event. Must leave premises*
 9. Suspension for present season or next season. Must leave the premises*
- * Must leave the premises may be option of the Race Director.

32. Updated/New Regulations

33. Sporting Regulation Violations:

-Every effort will be made to notify drivers of Sporting Regulations or on track violation calls at the scale area.

-Drivers wishing to protest rulings made in regards to Sporting Regulations or on track calls must complete an Official Protest Form

33.1. Sporting Protests:

-Protest forms are available at the scale area.

-Protests must be completed and returned to the scale area (or other designated location as per event supplemental) within 30 minutes of notification.

-Protests may only be filed by a driver or their representative and only for matters in a class they participate in. A fee may be required with all protests, at the time of filing.

34. Technical Regulation Violations:

-Drivers wishing to protest rulings made regards to Technical Compliance rulings must complete an Official Protest Form.

34.1. Technical Protest:

-Protest forms are available at the scale area.

-Protests must be completed and returned to the scale area (or other designated location) within 30 minutes of notification.

-Protests may only be filed by a driver or their representative and only for matters in a class they participate in. A fee may be requires with all protests, at the time of filing.

35. Protests:

-Once a protest of a Sporting Regulation violation or Technical Compliance violation protest is filled, the appointed race officials will gather additional information and review the facts. Non official video will not be considered. All information will be considered and a decision will be made. Notification of the decision will be made prior to in involved parties taking to the track for their next session.

36. Appeals:

-Should a driver wish to appeal any decision that is made regarding a protest, an official Event Appeal Form may be required to be filed with an accompanying fee. The Event Appeal Committee (if established) will hear all information gathered from both sides of the discrepancy and make a ruling. This ruling will be deemed final and no further process will be considered. Any driver not complying with any Appeal decision may be disqualified from the event and further participation in additional affiliated events may be forfeited.

37. Podium:

-The Drivers classified 3rd, 2nd and 1st in the Final shall climb on the podium one after the other.

-The first 3 competitors must wear their overalls zipped up at prize giving ceremonies.

-If caps are supplied by the organizer they must be worn by the drivers during the podium ceremony.

-Competitors who fail to adhere to these podium standards or who fail to appear for the podium ceremony without the approval of the Chief Steward may be subject to penalty, including monetary fines, exclusion from the event and loss of points and awards.

38. Fire Extinguisher:

-Competitors are required to have a fully serviceable, minimum 8 pound, ABC rated fire extinguisher in their pit at all times. Failure to have this item could result in monetary fines and/or exclusion from the event

-This guideline is a minimum; as the local track option will take precedence over this rule, if the minimum is greater.

39. Video and Photography:

-By entering participant areas at any RMC or IRMC, all participants agree that the event organizer and or promoter and its sponsors may use official photographs or video featuring participants for advertising, publicity and public relations purposes without restriction

40. Event area Access

-Any person found inside an official RMC or IRMC event areas, who has not signed the proper liability insurance waiver form is subject to exclusion from the current and any future RMC or IRMC events and/or a fine of minimum \$100 cash. If it is determined that the person is part of a specific drivers' crew that driver may be subject to point and time penalties.

41. Event Clean Up

-As per Event Supplemental Regulations

-It is asked by each promoter and series operator that each Entrant takes the responsibility of their own clean up. This has been an issue in the past and supplemental regulations may apply.

*The rules, as stated above shall be interpreted in a logical manner. The interpretation of the rules shall follow a logical thought process. Every situation cannot be foreseen. The officials shall apply the rules in a manner that does not strain the intent of the written rule.
